

Xavier Pilasi

Tech Product Owner

Profile

Tech Product Owner and Product Manager with 12+ years of experience leading business strategy, digital initiatives, and operational improvement. Transitioned into software development to strengthen my technical foundation, building hands-on expertise through real-world projects, frameworks, and AI-driven workflows. Passionate about integrating business insight with technical execution to create scalable, high-impact digital solutions in dynamic environments.

Education

Frontend Developer at La Salle, Barcelona

May 2024 - November 2024

Development of modern and functional web interfaces/applications, using technologies such as HTML, CSS, and JavaScript, along with advanced frameworks and tools like Vue.js and Tailwind CSS. The program included responsive design, web accessibility, API integration, version control with Git, and performance optimization. Additionally, I consolidated knowledge gained over two years of self-learning, incorporating industry-standard practices. I also gained expertise in usability and best practices for working on collaborative projects.

Bachelor Degree - Business Administration at UDP, Santiago

Mar 2005 - September 2010

Employment History

Frontend Developer | Freelance at GLUECHARM, Barcelona

December 2024 - July 2025

Website rearchitecture: Vue 3

Procurement Support at TD SYNNEX, Barcelona

September 2021 - July 2022

Manage, administer, and enhance the control tools within the purchasing department, ensuring their effectiveness and efficiency in the procurement process.

Product Manager Business Innovation & Development at VETERQUIMICA, Santiago

May 2016 - March 2020

Led product and innovation initiatives, developing internal tools and digital platforms to improve operations. Managed backlogs, MVP deliveries, and cross-functional collaboration with technical and business teams.

Product Manager at NUTRALINE, Santiago

May 2014 - May 2016

Responsible for the complete supply chain, marketing in point of sales and Private Brand development for the Chilean Market.

Project Manager at WALMART, Santiago

Feb 2011 - September 2013

Leader of the Global Branded Imports project: responsible for the supply chain of international products (groceries).

Last Own Projects

Activitier

August 2025 - October 2025

Full-stack project designed to efficiently manage activities within a hotel environment.

Key features: user profiles, booking management, instructor assignments, and instructor payment management.

Includes a modern UI and an enhanced UX for a professional experience.

2025 | Web | Vue.js | Javascript | Supabase | Pinia

SeriesLab - Github

October 2024 - November 2024

Web application developed as the final project for our Frontend Development certification at LaSalle. The goal is to provide a complete experience for users to search, review, and explore TV series.

2024 | Web | Vue.js | Javascript | Firebase/Firestore | Pinia

Gorilla Grab - Github

July 2023 - May 2024

As a climber I wanted to create a training tracker in order to know how my climbing performance was going. I designed all the features to solve specific problems I've been facing with other apps.

2023 | Mobile | Flutter | Dart | Firebase/Firestore | GetX
